## **Work Experience**

**2005- Present**

### **Road Crash and Victim Information System Manager**

5 years as a project manager of Road Crash and Victim Information System Manager of Handicap International Belgium, to implement database management system in Cambodia through data collection from police and health. I have been managing project activities, monitoring and evaluation, planning, financial management, partner relation, data analysis and reporting. I have introduced the Global Positioning System for traffic police integrated with the database management system by using GIS software in Cambodia. Responsible for integrating the traffic police and health data to become a unique system as other countries do not have such system yet and it is model for developing countries also. Related to training, I have good relationship with the government partners to organize the training to traffic police and health to fill in road crash data collection smoothly every year. Regarding the hand over the system to Ministry of Health, Ministry of Interior and National Road Safety Committee, I provide the training to appointed staff by ministries on the database management , technical support and follow up to ensure that the system will be handover to Ministry of Health, Ministry of Interior and National Road Safety smoothly and sustainability.
